

THE ONWARD VERIFIED PROCESS

Our framework documents material sourcing, lot records, applicable analytical testing, traceability, inventory status, and fulfillment records for research review.

WHAT "ONWARD VERIFIED" MEANS

- **DOCUMENTED** — Lot-level records where applicable.
- **TRACEABLE** — Inventory connects to internal lot records.
- **ANALYTICAL** — Testing claims tie to the applicable report or COA.
- **RESEARCH-FOCUSED** — Materials and communications remain positioned for research use.

IDENTITY ≠ PURITY

IDENTITY:

Does the material correspond to the represented substance?

PURITY:

What proportion is attributable to the specified component under the applicable analytical method?

WHAT IT DOES NOT MEAN

- Not FDA approval or clearance.
- Not a human- or veterinary-use claim.
- Not a therapeutic efficacy claim.
- Not a guarantee of research outcomes.
- Testing scope may vary by material and lot.
